

Children's Training Bicycle with Push Handle

This children's bicycle is designed for young riders learning to balance and pedal. It features sturdy training wheels, a comfortable saddle, a push handle, and front/rear fenders.

Product Overview

Designed for Young Riders

This children's training bicycle is purpose-built to help young riders master balance and pedaling with confidence. Featuring a durable steel frame and stable training wheels, it offers a secure platform for beginners. The inclusion of a parental push handle allows for safe assistance, while adjustable components ensure the bike grows with the child.
