

City Bus for Urban Transportation

This city bus is designed for urban transportation. It features a low-floor design, spacious interior, and climate control.

Overview

Urban Mobility Solution

The GZ6115S is a full-size city bus engineered specifically for efficient urban transportation. Featuring a low-floor design, it prioritizes passenger accessibility while offering a spacious interior and panoramic views through large windows. Powered by a robust diesel engine, this vehicle ensures reliable performance and passenger comfort in diverse weather conditions through integrated climate control systems.
