

Clamshell Feature Phone with External Display

This is a clamshell mobile phone with a metallic finish. It features a circular external display that shows contact photos, time, network signal, and battery level.

Product Overview

Compact Clamshell Design

This clamshell feature phone combines a classic, durable form factor with modern convenience. Featuring a metallic finish and a compact design, it is built for portability and ease of use. The device includes a dedicated external display, allowing users to quickly check the time, network status, and incoming caller information without needing to open the phone.
