

Clean Water Jet Pump for Domestic Use

This jet pump is designed for pumping clean liquids without solid or frictional matter. It is ideal for domestic water supply, tank filling, and pressure boosting.

Overview

Reliable Clean Water Jet Pump

This high-performance jet pump is engineered for efficient water transfer and pressure boosting in residential environments. Designed for clean water applications, it features robust construction including copper wiring and cold-rolled silicon steel sheets for enhanced precision and efficiency. With anti-rust treatments and stainless steel components, this pump is built to provide a long-lasting and reliable water supply for irrigation, tank filling, and domestic needs.

Typical Applications

- Tank filling
- Domestic water supply
- Water transfer
- Pressure boosting
- Irrigation

Technical Specifications

Performance Metrics

9 m

Suction Lift

6 bar

Max Working Pressure

35 °C

Max Liquid Temp

40 °C

Max Ambient Temp

Construction & Quality

Key Components

100% Copper wire, Cold-rolled silicon steel, Stainless steel nuts, Anti-rust casting, Electrophoresis coating

Compliance & Market

Certifications

CE • RoHS • ISO 9001 • ISO 14001 • OHSAS 18001
