

Clean Water Transfer Pump

The IP Series water pump is a robust and efficient solution for various water transfer applications. It is designed for clean water applications and can handle a maximum liquid temperature of 40°C.

Overview

Clean Water Transfer Pump

The IP Series water pump is a robust and efficient solution designed for various clean water transfer applications. Featuring a durable cast iron body and a high-quality, thermally protected motor, it ensures reliable performance and longevity. Its compact design allows for easy installation in confined spaces, making it an ideal choice for domestic water supply, irrigation, and pressure boosting systems.

Performance Metrics

Max Suction Lift

8 m

Max Suction Lift

Technical Specifications

Max Liquid Temperature	40 °C
Pump Body Material	Cast Iron
Motor Features	Thermally Protected, High-Quality Motor

Applications

Recommended Applications

- Domestic water supply
- Irrigation systems
- Pressure boosting systems
