Product Overview

Professional Impact-Resistant Safety Goggles

These clear lens safety goggles feature an arc full-slice design, providing users with a wide, unobstructed field of vision and a reliable sealing effect. Engineered for comfort and durability, the design incorporates four indirect vent valves to ensure proper air circulation and reduce fogging during extended use. Conforming to EU EN166 standards, these goggles offer professional-grade eye protection suitable for various demanding industrial and laboratory environments.

Technical Specifications

Available Customizations

- Added sponge padding
- Surface reinforcement treatment
- Anti-fogging coating
- Color plating
