

Close-Coupled Centrifugal Pump for Industrial and Agricultural Use

This close-coupled centrifugal pump is designed for diverse industrial and agricultural applications. It features a sturdy build with flanged connections for straightforward setup, making it ideal for drainage and irrigation.

Product Overview

Professional ISW Series Centrifugal Pump

The ISW series is a close-coupled centrifugal pump engineered for high-performance fluid transfer in industrial and agricultural settings. Featuring a robust, durable construction, this pump ensures reliable operation for critical systems such as irrigation and large-scale drainage. Its flanged design allows for simplified installation and integration into existing piping networks, making it an efficient solution for clean water handling.

Technical Specifications

Compatible Fluids

- Clean water
- Liquids with similar physical properties

Pump Configuration	Close-coupled centrifugal
Connection Type	Flanged inlet and outlet
Applications	Industrial, Agricultural, Drainage, Irrigation
