

Clutch Assembly 191x132 mm

This clutch assembly measures 191x132 mm. It is designed for power transmission applications in various vehicle models.

Overview

High-Performance Clutch Assembly

This clutch assembly is engineered for efficient power transmission and reliable torque transfer in automotive mechanical systems. Featuring a robust construction with a durable outer casing and specialized internal components, it is designed to withstand demanding operating conditions. Its precise dimensions ensure seamless integration, making it a dependable choice for maintenance and repair applications.

Technical Specifications

Part Number	479Q-190
Dimensions	191 x 132 mm

Compatibility

Compatible Vehicle Models

- Geely Free Ship
- Geely Kingkong
- Geely Gold Eagle
- SMA
- Lifan 320
- Lifan 520
