

Clutch Disc for Auto Transmission Systems

This clutch disc is designed for superior power transmission and durability. With advanced friction materials and precision manufacturing, the clutch disc ensures optimal engagement and smooth operation for a range of vehicle applications.

Product Overview

High-Performance Clutch Disc

This high-performance clutch disc is engineered for demanding automotive transmission systems, including racing, modified, and drift vehicle applications. Designed with advanced friction materials and precision manufacturing, it ensures optimal power transmission, smooth engagement, and enhanced durability. This component is built to provide reliable service life under the rigorous conditions required by high-performance driving.

Application & Usage

Suitable Vehicle Types

Racing Car, Modified Car, Drift Car

Technical Features

Key Performance Metrics

1 High

Quality Grade

Core Features

- Advanced friction materials
- Precision manufacturing
- Optimized for power transfer
- Enhanced durability
