Product Overview

Precision-Engineered Clutch Guide Sleeve

This clutch guide sleeve is designed to ensure smooth and reliable clutch operation by maintaining proper alignment and reducing friction between the clutch fork and the release bearing. Constructed from durable steel with precision-machined surfaces, it offers extended service life and optimal performance in demanding automotive applications. The component features a robust flange with mounting holes for secure and reliable attachment.

Compatibility

Compatible Vehicle Models

Part Number	Compatible Models
210538	Peugeot 301
210535	Peugeot 307, 308, 408, Citroën C4

Technical Details

Material	Durable Steel
Features	Precision-machined, Robust flange, Wear reduction, Secure mounting
