

# Clutch Pressure Plate Assembly

This clutch pressure plate assembly is a critical component in a manual transmission system. It is designed to apply pressure to the clutch disc, enabling the engine to transmit power to the transmission.

## Product Overview

### High-Performance Clutch Assembly

This clutch pressure plate assembly is a critical component engineered for manual transmission systems, designed to ensure efficient power transfer from the engine to the transmission. Featuring a robust metal housing and a precision-engineered diaphragm spring, it provides consistent clamping force under demanding operating conditions. The assembly is built for durability and seamless integration, making it a reliable solution for various automotive applications.

## Technical Specifications

### Design Features

- Metal housing
- Diaphragm spring mechanism
- Splined central hub
- High-durability construction

<b>Component Type</b>	Clutch Pressure Plate Assembly
<b>Application</b>	Manual Transmission, Automotive
<b>Mounting</b>	Bolted to engine flywheel
