

CNC Lathe

This CNC lathe is a precision machine tool used for metalworking and manufacturing. It features a programmable control system for automated turning, facing, threading, and other machining operations.

Overview

Precision CNC Turning Solution

This Computer Numerical Control (CNC) lathe is a versatile precision machine tool engineered for high-performance metalworking and manufacturing. Designed with a robust, rigid frame and a fully enclosed workspace, it ensures both operator safety and efficient chip containment during operation. Equipped with an advanced programmable control system, this machine excels at automated turning, facing, and threading, making it an ideal choice for producing complex parts from steel, aluminum, and plastics.

Technical Specifications

Compatible Materials

- Steel
- Aluminum
- Plastics

Model Number	CK6130
Machining Capabilities	Turning, Facing, Threading

Features

Key Features

Fully Enclosed Workspace • Programmable Control System • High-Speed Spindle • Integrated Coolant System
