

CNC Metal Shearing Machine

This high-precision CNC bench type machine is designed for metal shearing operations. It offers automated control and accuracy in metal forming processes.

Product Overview

High-Precision CNC Metal Shearing

This high-precision CNC bench-type machine is engineered for efficient metal shearing operations. It features automated control systems to ensure superior accuracy in metal forming processes. Designed for versatility, it is an ideal solution for various metalworking applications that require precise cuts and consistent shaping.

Technical Specifications

Machine Type	CNC Bench Type
Primary Function	Metal Shearing
Key Features	Automated Control, High Precision, Bench-top Design
