

CNC Precision Engineering Lathe

This precision engineering lathe is designed for machining various materials with high accuracy. It features a numerical control system for automated and precise movements.

Overview

Precision CNC Engineering Lathe

This precision engineering lathe is designed for high-accuracy machining across a variety of materials. Built with robust construction to ensure stability during operation, it features a numerical control system for automated, precise movements. It is fully equipped with a protective enclosure to prioritize operator safety and is suitable for diverse machining tasks including turning, facing, and threading.

Technical Specifications

Model Number	CK6130
Machining Capabilities	Turning, Facing, Threading

Features

Safety & Control

- Numerical control system
- Protective safety enclosure
- Robust construction for stability
