

CNC Profile Processing Center

This high-speed 3-axis CNC processing center is designed for profile processing. The equipment ensures accurate and efficient machining of various profile shapes with its robust construction and precision control system.

Overview

Professional CNC Profile Processing

The High-speed 3-axis CNC Processing Center is an advanced industrial solution designed for precision profile machining. Engineered for versatility, it excels in tasks involving doors, windows, and curtain wall component manufacturing. With its robust construction and high-accuracy control system, this machine provides consistent, high-speed performance for demanding industrial applications.

Technical Specifications

Performance Key Indicators

3 axis

Axes

Model Identifier	GS3Z-CNC-7000
Axis Type	3-Axis

Application & Suitability

Application Fields	Industrial Profiles, Door Manufacturing, Window Manufacturing, Curtain Wall Processing
--------------------	--

Components & Control

Core Machine Components

- Control Panel
- Multi-axis Machining Unit
- Workpiece Holding Mechanism
