

CNC Router for Woodworking

This CNC router is designed for woodworking and other soft materials. It features a high-speed spindle and a stable frame, ensuring smooth and accurate cuts.

Overview

Professional Woodworking CNC Router

This CNC router machine is a cost-effective solution designed specifically for woodworking applications, offering a balance of robust construction and precise cutting capabilities. Its user-friendly operation makes it an excellent choice for both hobbyists and small businesses looking to enhance their production. The compact design ensures it fits well in workshops with limited space while maintaining high performance.

Technical Specifications

Certifications

CE

Model Number

KC6090

Compatible Materials

Wood, Plastic, Acrylic, Soft Materials

Key Features

Performance Highlights

1 High-Speed

Spindle Speed

Design Benefits

- Robust construction for durability
- Precise cutting capabilities
- User-friendly interface
- Compact footprint for small workshops
- Stable frame for smooth operation
