

CNC Vertical Machining Center

This CNC vertical machining center is designed for metalworking applications requiring precision. It features a multi-axis configuration and automated tool changing for complex part machining.

Overview

High-Precision Vertical Machining Center

This CNC vertical machining center is engineered for demanding metalworking applications, offering high precision and robust construction. It features a fully enclosed workspace to ensure safety and cleanliness during operation, alongside an advanced control system for seamless workflow management. Equipped with multi-axis configuration and automated tool changing capabilities, it is designed to handle complex part machining with efficiency.

Technical Specifications

Automation Features

- Automated tool changing
- Multi-axis configuration

Model Identifier	VB2-370
Machine Type	Vertical Machining Center
Construction	Fully enclosed workspace, Robust construction

Performance

Performance Highlights

1 Multi

Axis Configuration
