

CNC Wood Carving Machine

This CNC wood carving machine is designed for high stability and performance. It is ideal for intricate wood carving, engraving, and milling applications.

Overview

Professional CNC Woodworking Solution

This CNC wood carving machine features a robust, seamless steel welded structure designed for maximum stability and minimal deformation during heavy-duty operation. Equipped with a world-class 4.5KW air-cooled spindle, it excels at both intricate engraving and precise cutting tasks across solid wood and density boards. Designed for professional workflows, the machine integrates advanced software compatibility and intelligent features like power-failure recovery and process time forecasting to ensure high efficiency.

Technical Specifications

Performance Metrics

4.5 KW

Spindle Power

Transmission Components

Axis	Transmission Type
X and Y Axes	Rack and Pinion
Z Axis	Ball Screw

Features

Software Compatibility

- Type3
- Artcam
- Castmate
- Wentai

Operational Functions

Dust-collect system, Break-point resume, Power failure recovery, Process time forecasting

Quality Standards

Certifications

CE
