

CNC Wood Lathe

This CNC lathe is designed for woodworking applications, offering precision and automation in wood turning. The computerized numerical control system allows for intricate designs and repeatable results in producing wooden furniture components and decorative items.

Overview

Precision Woodworking Capability

The KC1530-S is a professional-grade CNC lathe machine engineered specifically for woodworking applications. It provides advanced automation for complex wood turning, shaping, and carving tasks, ensuring high precision and repeatability. This machine is an ideal solution for manufacturing furniture components, decorative woodwork, and custom-designed wooden parts with consistent quality.

Technical Specifications

Model Number	KC1530-S
Certifications	CE
Machine Type	CNC Wood Lathe

Applications

Primary Applications

- Furniture components
- Decorative wood items
- Custom wood parts
- Wood turning and shaping
