Overview

High-Precision CNG Pressure Monitoring

This industrial-grade pressure gauge is engineered specifically for Compressed Natural Gas (CNG) applications, offering reliable performance in demanding environments. It features a robust, customizable design with multiple material options for the case, window, and internal components to suit specific operational requirements. Compliant with EN837 standards, this gauge ensures accurate pressure measurement from 0 to 400 bar, making it an essential component for safe and efficient CNG system management.

Technical Specifications

Dial Size	2 inch
Pressure Range	0-400 bar
Compliance Standards	EN837, EN837-1

Materials & Construction

Case Material Options

SS304 • SS316 • Black Steel • Plastic

Window Material Options

Glass • Tempered glass • Safety glass • PC glass • Acrylic

Connection Materials

SS316 • SS304 • Brass

Movement Materials

SS304 • Brass

Installation

Mounting Options

- Bottom
- Back
- Lower Back

Thread Types

PT, NPT, G

Performance

Gauge Type

Liquid type / Dry type

Bourdon Tube Materials

SS316, Phosphor bronze
