

CNMM 190616 CNC Turning Inserts

These CNC cemented carbide turning inserts are suitable for machining steel, stainless steel, and cast iron. They offer long use lifetime and stable performance.

Product Overview

Professional CNC Turning Inserts

These CNMM 190616 cemented carbide turning inserts are engineered for precision machining across a variety of industrial applications. Designed for stability and durability, they offer an extended tool life to help optimize your manufacturing processes. These inserts deliver reliable performance when machining steel, stainless steel, and cast iron.

Technical Details

Model Number	CNMM 190616
Compatible Materials	Steel, Stainless Steel, Cast Iron

Service & Quality

Service Highlights

- Stable performance and long service life
- Technical support available
- After-sales services provided
- Custom manufacturing from drawings or samples
- Small orders accepted
