Product Overview

Professional Cocoa Bean Peeling

This automated peeling machine is designed specifically for the efficient removal of shells from cocoa beans. Engineered for high-performance food processing, it ensures a clean separation of skins while maintaining bean integrity. Its robust design makes it an ideal solution for small to medium-sized chocolate and cocoa production facilities.

Key Features

Performance Highlights

- High-level automation for consistent results
- Effective shell removal and clean separation
- Low-noise operation
- Pollution-free processing environment

Construction & Design

Construction Material	Stainless Steel
Key Components	Cylindrical Hopper, Processing Unit, Control Panel, Automated Motor

Service & Warranty

Warranty Period	1 Year
Service Policy	Lifelong maintenance provided with technical support
