

Cold Storage Room

This cold storage room offers a comprehensive set of features tailored to specific cold storage needs. It features polyurethane panels with various thickness options and a high-speed refrigeration unit designed for reliable and durable performance.

ADDITIONAL IMAGES

Overview

Professional Cold Storage Solution

This modular cold storage system is engineered for high-efficiency thermal preservation and rapid cooling across diverse industrial applications. Built with advanced polyurethane insulation panels and robust refrigeration units, the system offers reliable, energy-saving performance for food, pharmaceutical, and industrial cooling needs. The design incorporates 40 years of engineering expertise to ensure durability, low noise operation, and precise temperature control.

Suitable Applications

Fruit and Vegetable Preservation, Meat Freezing, Seafood Quick Freezing, Medicine Storage, Ice Making, Workshop Cooling

Panel Specifications

Available Panel Thickness

- 75mm
- 100mm
- 120mm
- 150mm

Polyurethane Material Properties

42 kg/m³
Density

5 s
Flame Retardant Time

Construction Details

Feature	Specification
Hook Distance	900mm
Panel Materials	Color steel, Stainless steel, Embossed aluminum
Door Types	Hinged, Sliding

Refrigeration System

Compressor Technology

Scroll • Piston • Screw

Evaporator Type

Blow type with aluminum pipe

Key Performance Benefits

Fast Refrigeration, Energy Saving, Low Noise, Low Vibration, High Reliability
