

Collapsible Travel Electric Kettle

This compact electric kettle is designed for travel, featuring a collapsible, food-grade silicone body. Its dual voltage capability and stainless steel heating plate make it suitable for worldwide use.

Product Overview

Versatile Travel Companion

The Collapsible Travel Electric Kettle is designed specifically for travelers and individuals with limited storage space. Featuring a high-quality food-grade silicone body, it offers a space-saving design that collapses for easy packing without compromising on utility. With integrated safety features such as boil-dry protection and automatic shut-off, it ensures peace of mind during daily use.
