

Combination Belt and Disc Sander

This sanding machine is designed for woodworking and finishing tasks. It features a combination belt and disc sander, suitable for both flat surface sanding and edge shaping.

Product Overview

Versatile Sanding Performance

The MM4113 combination belt and disc sander is engineered for diverse woodworking and finishing applications. This unit offers both belt sanding for flat surfaces and disc sanding for precise edge shaping tasks. With an integrated adjustable work table, users can achieve accurate angle sanding, while the sturdy base construction ensures stability and operational reliability in small workshops.

Key Features

Machine Features

- Integrated belt and disc sanding stations
