

Combination Pliers for Gripping, Cutting, and Bending

Professional-grade combination pliers are designed for gripping, cutting, and bending various materials. They feature hardened steel jaws, precision-machined cutting edges, and ergonomic handles.

Product Overview

Industrial Grade Combination Pliers

These industrial-grade combination pliers are engineered for professional gripping, cutting, and bending tasks. Constructed from high-quality CRV (Chrome Vanadium) material, they offer exceptional durability and strength for heavy-duty applications. The design features a double-colored handle for improved ergonomics and visibility during use.
