Overview

Professional Combination Pliers

These versatile combination pliers are engineered for durability and precision, featuring forged steel construction and induction-hardened cutting edges. Designed for high performance, they incorporate a high-leverage joint to reduce user effort during cutting and gripping tasks. The ergonomic dual-component handles ensure a secure, comfortable grip, making them suitable for demanding electrical, mechanical, and general repair environments.

Technical Specifications

Material	Forged Steel
Handle Design	Dual-component ergonomic
Cutting Edge	Induction-hardened

Features

Key Features

- High leverage joint design
- Serrated jaw surfaces
- Integrated wire cutting shear
- Flat and serrated gripping surfaces

Suitable Applications	Electrical Work, Mechanical Repair, General Maintenance, DIY Projects
