Product Overview

Professional Grade Combination Pliers

These combination pliers are engineered for high-performance gripping, cutting, bending, and wire-stripping tasks. Built with hardened steel jaws, they offer exceptional durability and longevity in professional environments. The insulated grip design ensures safety during electrical work, making them a versatile and essential tool for both mechanical and electrical applications.

Technical Specifications

Safety Standards

Insulated Grip

Target Applications

- Electrical installation
- Mechanical maintenance
- General workshop tasks

Tool Capabilities

Gripping, Cutting, Bending, Wire Stripping

Material Composition

Hardened Steel
