

# Combination Wrench Set

This combination wrench set includes both open-end and ring-end wrenches. Constructed from durable metal alloy, these tools are suitable for various mechanical applications.

## Overview

### Professional Combination Spanners

These combination spanners are engineered for versatile mechanical applications, featuring both open-end and ring-end designs for maximum utility. Constructed from high-quality carbon steel or alloy steel, they undergo precise heat treatment to ensure durability and long-lasting performance. With a polished head and sand-blasted handle finish, they offer both aesthetic appeal and a secure grip for demanding tasks.

## Technical Specifications

### Surface Treatment

- Fully polished head
- Sand-blasted handle
- Chrome plated
- Ni-Ni-Cr finish

### Design Style

Raised Panel

### Material Options

45# Carbon Steel, 40CrV Alloy Steel

### Size Range

27mm - 65mm

## Performance Metrics

### Heat Treatment Hardness

**44 HRC**

45# Carbon Steel Max

**48 HRC**

40CrV Alloy Steel Max

## Logistics

### Packaging

Bulk
