

Commercial Air Curtain

This air curtain features a rust-free aluminum casing. It delivers a powerful air velocity of 20m/s.

Overview

Professional Commercial Air Curtain

This commercial air curtain is engineered to create a powerful, uniform barrier of forced air, effectively separating indoor and outdoor environments. Designed with a sturdy, rust-free aluminum alloy housing, it provides both durability and a sleek, modern appearance suitable for diverse commercial settings. With advanced control options including remote, switch, and door-integrated operation, this unit ensures optimal climate control and energy efficiency by preventing the intrusion of dust, insects, and pollutants.

Performance

Air Velocity

14.5 m/s

Air Speed

Construction & Design

Housing Material	Aluminum alloy
Corrosion Resistance	Yes

Control & Operation

Control Methods	Remote Control, Switch Control, Door Control
-----------------	--

Technical Specifications

Fan Technology	Centrifugal fan and wheel
Airflow Quality	Uniform forced air flow
