Overview

Professional Commercial Coffee Solution

This high-performance automatic coffee machine is engineered for demanding commercial environments, offering the capacity to produce eight distinct coffee varieties. It features an advanced 12-grade adjustable bean grinding system and a dual boiler and pump architecture to ensure consistent, high-quality extraction. Designed for ease of use and maintenance, the unit includes an intuitive LCD interface, automated rinsing cycles, and intelligent alerts for water and bean replenishment.

Key Features

Core Capabilities

- 12-grade adjustable bean grinding system
- Eight pre-programmed coffee varieties
- Six-language operation interface
- Automated rinsing system on startup and shutdown
- Intelligent alarms for water and bean shortage
- External water source connection capability
- Self-discharge wastewater system
