Product Overview

Commercial Brewing Solution

This professional-grade commercial beer brewing system is designed for high-efficiency production and consistent quality. Built from high-quality SUS304 stainless steel or red copper, the system integrates all essential processes from milling and saccharification to fermentation and refrigeration. It is a complete, scalable solution suitable for commercial breweries requiring reliable equipment with advanced control systems.

Technical Specifications

Material	SUS304 Stainless Steel, Red Copper
Place of Origin	Shandong, China
Primary Processing	Fermenting

System Components

Included Equipment

- Milling system
- Saccharification system
- Fermentation system
- Refrigeration system
- Washing and sterilization system
- Control system
- Accessories

Logistics

Delivery Lead Time	35 days
Packaging	Wooden case or other
