

# Commercial Car Elevator for Buildings

This car elevator is a vertical transportation solution for commercial and residential buildings. It offers smooth operation and customizable interiors.

## Product Overview

### High-Efficiency Commercial Car Elevator

The WIN 610 Series is an advanced vertical transportation solution designed for both commercial and residential applications. It features a space-saving MRL or mini-machine room design that optimizes building utility ratios while providing a high load-bearing capacity. Equipped with integrated control systems and VVVF door technology, the unit ensures smooth, quiet, and reliable operation for heavy-duty requirements.

## Technical Features

### Performance Highlights

**610**

Series Model

**1 High**

Efficiency Rating

### Core Technologies

- SPM Traction machine for energy efficiency
- Integrated control system
- Direct levelling technology
- VVVF rod type door mechanism

## Design and Installation

### Installation Attributes

Mini-Machine Room, MRL Design, Easy Installation, Durable Construction

## Safety and Maintenance

### Safety Equipment

- Emergency braking system
- Backup power support
- Communication system
- Smooth door operation
