

Commercial Fishing Vessel

This vessel is designed for long-range fishing operations in open ocean environments. It is suitable for harvesting aquatic animals and plants.

Overview

Modern Commercial Fishing Fleet

These modern commercial fishing vessels are designed for long-range operations in open ocean environments, including the Southwest Atlantic, North Pacific, and West African waters. The fleet operates year-round, supporting a robust, integrative management system that encompasses fishing, refrigeration, marketing, and logistics. With a focus on high-capacity output, these vessels are engineered to meet the demands of large-scale, international commercial fishing operations.
