

Commercial Fritter Machine

This universal fritter machine is designed for food processing applications. It features a stainless steel construction for durability and hygiene.

Product Overview

Professional Fritter Processing

This universal fritter machine is engineered for high-efficiency food processing in commercial kitchens and industrial food production facilities. Constructed from durable stainless steel, it ensures optimal hygiene standards and long-term reliability. The intuitive control panel features a clear selector switch, lamp indicator, and start button, allowing for straightforward operation and precise control over the fritter production process.

Technical Specifications

Material

Stainless Steel

Control Interface

- Selector switch
- Lamp indicator
- Start button

Model Number

QS505A

Application

Suitable For

Commercial Kitchens, Food Processing Facilities, Industrial Food Production
