

Commercial Frozen Drink Dispenser

This commercial slush machine is designed for producing and dispensing frozen beverages. It features independent controls for each hopper, allowing for different flavors or textures to be served simultaneously.

Overview

High-Performance Frozen Beverage Solution

This commercial-grade frozen drink dispenser is engineered for high-volume environments, offering reliability and ease of use. Featuring a dual-hopper design, it allows operators to serve two different flavors or textures simultaneously with independent controls for each. Built with durable materials and an efficient cooling system, it ensures consistent freezing temperatures and long-lasting performance for your beverage service needs.

Technical Specifications

Hopper Configuration	Dual Hopper
Control System	Independent controls for each hopper

Features

Key Features

- Independent hopper controls
- High-efficiency cooling system
- Durable construction
- Easy-dispensing taps

Suitable Environments	High-volume, Commercial, Food & Beverage
