

Commercial Ice Block Production Machine

This ice block maker is a robust refrigeration unit designed for efficient ice block production. Its design ensures consistent ice block formation, making it a reliable solution for various cooling needs.

Overview

Commercial Ice Block Production Machine

This high-performance ice block machine is engineered for reliability and efficient operation in demanding commercial environments. It features advanced compressor technology sourced from top international manufacturers, integrated with patented energy-saving systems to reduce operational costs. Designed for durability and ease of use, the unit includes robust protective functions to ensure stable performance even in regions with unstable power supply.

Performance

Ice Production Cycle

Cycle Duration	Status
2 Hours	Available
3 Hours	Available

Key Features

Operational Highlights

- Stable running performance
- Easy cleaning and maintenance
- Simple operation interface
- Multiple protective functions for unstable power

Design Qualities

Energy Efficient, Durable Construction, Commercial Grade
