

Commercial Ice Cube Production Machine

This commercial ice cube machine is designed for high-volume ice production. Its efficient refrigeration system ensures rapid ice making.

Product Overview

Professional Commercial Ice Maker

This high-performance commercial ice machine is designed to meet the rigorous demands of restaurants, bars, and hospitality venues. Engineered for efficiency, it produces clear, solid, and pure cubic ice with rapid freezing and dropping cycles to save both time and energy. The unit features a durable, oil-resistant exterior for easy maintenance and hygiene, alongside advanced computer-controlled systems for reliable, low-fault operation.

Performance & Features

Key Features

- Computerized system monitoring
- Integrated over-load protection
- Oil-resistant face plate treatment
- High-speed ice production
- Energy-efficient operation

Ice Characteristics

Clear, Solid, Pure, Cubic

Operational Safety

Safety Systems

Over-load Protection • Automatic Fault Detection

User Friendly

Yes
