Product Overview

Heavy-duty industrial washing machine designed for high-capacity commercial laundry applications.

High-Efficiency Industrial Laundry Solution

This industrial washing machine is designed for high-volume commercial environments, including hotels, spas, and professional laundry facilities. It features advanced technology that enables effective decontamination, sterilization, and deodorization without the need for traditional chemical detergents, helping businesses significantly reduce operational costs. Built with durable SUS 304 stainless steel, this robust machine is engineered to handle large daily loads while maintaining hygiene and performance standards.
