

Commercial Vehicle Parking Sensor

This digital sensor is designed for commercial vehicle parking sensor systems. It provides accurate and reliable proximity detection, enhancing safety and maneuverability.

Product Overview

Advanced Commercial Parking Assistance

This high-performance digital sensor is engineered specifically for commercial vehicle parking systems, providing reliable and accurate proximity detection. Designed for seamless integration, it supports both CAN and Serial communications, making it compatible with a wide range of vehicle electronics. Its robust construction ensures durability in demanding environments, while the combined harness design simplifies the installation process for fleet maintenance.

Technical Specifications

Detection Range	5 m
Minimum Detection Distance	0.25 m
Detection Reaction Time	300 ms

System Compatibility

Installation Highlights

- Combined harness design
- Easy to install
- Digital signal processing

Supported Protocols	CAN, Serial
Radar Support	12
