

Commercial Water Purification System

This commercial water purification system is designed for industrial and food service applications. It features a stainless steel exterior, hinged top, caster wheels, filtration system, and control panel.

Product Overview

Professional Water Purification Solution

This commercial-grade water purification system is engineered for industrial and food service applications, ensuring high-quality water output for sensitive equipment like ice machines and coffee makers. The unit features a durable stainless steel exterior built for longevity and a user-friendly control panel for real-time water quality monitoring. Designed with mobility and maintenance in mind, it includes integrated caster wheels and a hinged top for rapid access to internal components.

Technical Features

System Components

- Integrated filtration system
- Digital control panel
- Hinged access cover
- Caster wheel assembly

Housing Material	Stainless Steel
Mobility	Yes
Primary Applications	Food Service, Industrial Use, Ice Machines, Coffee Equipment
