

Compact Bullet Ice Maker

This compact ice maker produces bullet-shaped ice cubes in as little as 7 minutes. It maximizes the volume of the water tank and ice basket.

Product Overview

Compact design featuring electronic controls and efficient ventilation for consistent ice production.

Compact Innovation in Ice Making
 This compact bullet ice maker is engineered with proprietary compressor technology, maximizing internal space utilization to offer the smallest footprint while maintaining generous water tank and ice basket capacity. Designed for versatility, it features advanced electronic controls and supports expanded outdoor direct current power supply options. It is an ideal solution for environments requiring efficient, on-demand ice production without sacrificing space.

Key Features

Core Technologies	
<ul style="list-style-type: none"> • Proprietary compressor patent technology • Micro-DC compressor innovation • Independent intellectual property rights • Electronic control and display interface 	
Optional Configurations	Handle for entire machine, Ice-blue handle

Power & Connectivity

Power Supply Support	Yes
