

Compact Ceramic Space Heater

This is a compact and portable ceramic space heater ideal for personal use. It features adjustable temperature settings and safety features like overheat protection.

Product Overview

Compact Ceramic Heating Solution

The PHC504 is a compact and portable ceramic space heater engineered for personal heating needs. Utilizing advanced ceramic heating technology, it provides efficient and consistent warmth for small spaces, offices, or individual use. With built-in adjustable temperature controls and safety mechanisms like overheat protection and a tip-over switch, it combines performance with peace of mind.
