

Compact Ceramic Space Heater with Adjustable Thermostat

This is a compact and portable ceramic space heater designed for personal comfort. It features an adjustable thermostat for precise temperature control and safety features.

Product Overview

Compact Ceramic Space Heater

The PHC502B is a compact and portable ceramic space heater designed for personal comfort in small environments. Utilizing an efficient ceramic heating element, it provides consistent and even heat distribution. Users can easily customize their environment with the integrated adjustable thermostat, while built-in safety mechanisms like overheat protection and a tip-over switch ensure peace of mind during operation.
