

# Compact Circular Audio Buzzer

This compact audio device features a circular enclosure with a hook for suspension. Constructed from durable plastic, it is ideal for various audio applications requiring a small form factor and easy installation.

## Product Overview

### Compact Circular Audio Buzzer

This compact circular audio device is engineered for versatility and easy installation, featuring an integrated suspension hook for various mounting environments. Constructed from durable, high-quality plastic, it is well-suited for professional audio applications requiring a small form factor. Its internal winding mechanism makes it an excellent choice for specialized audio playback systems or mechanical signaling devices.

## Physical Specifications

Form Factor	Circular
Housing Material	Durable Plastic
Mounting Options	Suspension Hook, Easy Installation

## Technical Features

### Common Applications

- Music box components
- Audio playback systems
- Compact audio signaling

Mechanism Type	Winding Mechanism
