

Compact Circular Saw for Tile and Stone

This compact circular saw is designed for precise cutting of tile, stone, and masonry materials. It features a powerful motor for efficient cutting, a water feed system for dust suppression and blade cooling, and an adjustable cutting depth for versatile applications.

Product Overview

Compact Tile and Stone Circular Saw

This professional-grade compact circular saw is engineered for high-precision cutting of tile, stone, and masonry materials. It incorporates an integrated water feed system to optimize blade longevity while effectively suppressing dust during operation. The adjustable depth settings and ergonomic design ensure superior control and versatility for demanding construction and flooring projects.

Technical Specifications

Key Features

- Powerful motor for efficient cutting
- Integrated water feed system
- Adjustable cutting depth
- Ergonomic handle for enhanced control

Primary Applications

Tiling • Flooring • General Construction

Suitable Materials

Tile, Stone, Masonry

Recommended Users

Professional and DIY
