

Compact Electric Space Heater

This compact electric heater uses PTC (Positive Temperature Coefficient) technology for efficient and safe heating. Designed for personal space heating, the unit provides rapid warmth and features a user-friendly interface and a front grill for safety.

Product Overview

Efficient Personal Heating Solution

This compact electric space heater utilizes advanced PTC technology to provide rapid, safe, and efficient warmth for personal spaces. Designed with versatility in mind, the unit supports both table-standing and wall-mounted installations, making it suitable for various home or office environments. With user-friendly mechanical controls and an integrated air filter, it offers a convenient and clean heating experience.

Technical Specifications

Power Modes

- Cool wind
- Low heat
- High heat

Control Method	Mechanical switch control
Installation	Table standing, Wall-mounted

Features

Safety Design

PTC Technology • Safety Grill

Air Filtration	Yes
