

Compact Electromagnetic Induction Cooktop

This compact electromagnetic induction cooktop provides efficient and precise heating. It features a durable ceramic glass top and user-friendly controls with multiple settings and safety features.

Overview

Compact Electromagnetic Induction Cooktop

This compact electromagnetic furnace offers efficient and precise heating performance suitable for demanding cooking environments. It features a durable, smooth ceramic glass surface that ensures easy cleaning and long-term maintenance. Designed with safety in mind, the unit includes advanced features like overheat protection and automatic shut-off to ensure reliable operation.

Technical Specifications

Model Number	LB-100
Surface Material	Ceramic Glass

Features

Control Interface

- User-friendly control panel
- LED displays
- Adjustable power settings
- Adjustable temperature settings

Safety Features	Overheat Protection, Automatic Shut-off
