

Compact Exhaust Fan for Ventilation

This exhaust fan is designed for ventilating enclosed spaces. It features a durable plastic housing and a multi-blade propeller for effective removal of stale air and odors.

Product Overview

Compact Ventilation Solution

This compact and efficient exhaust fan is engineered to provide reliable ventilation for enclosed spaces. Featuring a durable plastic housing and a precision-designed multi-blade propeller, it effectively removes stale air and odors to maintain a fresh environment. The unit includes a practical backdraft damper, ensuring air does not re-enter the room when the fan is powered off.

Technical Specifications

Housing Material	Durable Plastic
Key Features	Compact Design, Multi-blade Propeller, Backdraft Damper

Applications

Recommended Environments

- Bathrooms
- Kitchens
- Small to Medium-sized Rooms
