

Compact Fluorescent Spiral Lamp

This compact fluorescent lamp (CFL), also known as a spiral lamp, is designed as an energy-efficient alternative to incandescent bulbs. It offers significant energy savings and a longer lifespan compared to traditional incandescent lamps.

Product Overview

Energy-Efficient Spiral Illumination

The compact fluorescent spiral lamp is a highly efficient alternative to standard incandescent bulbs, designed for seamless integration into existing light fixtures. Its signature coiled glass design utilizes phosphor-coated tubes to convert ultraviolet emissions into bright, visible light. Professional buyers can expect significant energy savings and a substantially longer operational lifespan, making it an ideal choice for large-scale lighting upgrades.

Technical Specifications

Lamp Technology	Compact Fluorescent Lamp (CFL)
Design	Spiral-shaped glass tube
Base Type	Standard screw base

Performance Features

Key Advantages	Energy Efficient, Long Lifespan, Easy Installation
